Executive summary:
The production staff at any corrugated box plant has a wide range of duties and responsibilities. Within the typical box plant, positions are available for die makers and die cutter operators, flexo press operators, ink attendants, and finishing functions. Some plants will include corrugator functions as well, providing even more opportunities. “Corrugators” are machines that manufacture corrugated board to be made into boxes or displays, or sold to other plants for this purpose. “Converting” refers to the manufacturing or converting of corrugated board into boxes.

Here are many of the job titles that fall into the production category:
